

## In-situ Pipeline Valve Service

### Service Description:

ACC has proven over many years that regular lubrication of Pipeline Valves will allow the valves to function correctly. Injecting lubricant or sealant into the grease injection fittings provides lubrication and/or sealant to the ball and seats.

### Key Elements:

- Correct product selection
- Procedures for lubrication/sealing
- Lubrication equipment
- Skilled personnel

### Products and Equipment:

#### Lubricants and Sealants

- DSI-200 Lubricant
- DSI-300-HS Lubricant
- DSI-500 Lubricant
- DSI-700 Sealant
- DSI-Liquid Valve Flush

#### Grease Injection Pumps

- Handheld Grease Guns
- Mini Lube Pumps
- 7K and 10K Double Ram Grease Pumps
- 10K Flush Pumps

#### Grease Injection Fittings:

- To ensure the valves can be maintained, grease injection fittings need to be fit for purpose and ACC provides these grease injection fittings.
