

## Wellhead Maintenance

ACC offers trained surface wellhead technicians along with specialised maintenance and well services equipment for onshore and offshore wells. Our Wellhead Maintenance service is backed by our range of purpose-built ACC products and high quality, proven lubricants, sealants, and flushing products. We offer specific testing and maintenance programs as instructed by our clients or can put together a full well integrity program to ensure your entire field is effectively tested and serviced.

ACC Corporate is committed to providing and maintaining excellent health, safety, and environmental safety standards. We educate and train our field technicians to ensure that a safe and healthy environment is continually promoted, implemented, and maintained on every job.
