API 6A Wellheads, Xmas Trees and Valves

Product Description:

SPM Oil and Gas (Formerly Weir Wellhead) appointed ACC Corporate its agent for the Australia, NZ and PNG region. Wellhead and X-Mas Tree equipment is primarily manufactured in Batam, Indonesia.

Our team will assist in the selection, design and

installation of the equipment best suited to your project, whether in the drilling, completion or production phases of your field development. We offer all materials and temperature ratings, product specification level up to PSL-4 and performance rating up to PR-2.

Key Offerings:

- Wellheads
- Xmas trees
- Gate valves
- Connectors
- Housings
- Spools
- Tubing and casing hangers
- Blind and test flanges

Features and Specifications:

- Up to 20,000 psi rated
- Product service level up to PSL 4,
- Performance rating up to PR 2
- 100% factory tested equipment
- Bespoke applications considered
- Coatings as per client specification

Swell Packers

Product Description:

Swell Packers reduce well construction costs, enhancing reliability of zonal isolation barriers and extend your well's productive life. After the swell has been run and set the material retains its ability to respond to changing well conditions and so age-related issues such as cement micro-annulus channel are less likely to compromise your zone integrity, and irregular hole geometry is much better shut off than with mechanical or inflatable packers.

Key Features:

- Oil Swells
- Water Swells
- Fast acting water swells
- Combination swells

Features and Specifications:

- Swell elements are designed as required per well
- Swell simulations provided
- Control line feedthrough available
- Up to 800% swell volume
- Temperature ranges up to 205oC
- Swell retardant coatings optional
- Maintains high swell volume over well life
- Available in all casing and hole sizes
- Pipe bonded and swell sleeve designs
